Product designer with hands-on experience in interaction and visual design, prototyping, and user research for hardware and AI-first consumer products. Ships end-to-end features and high-fidelity prototypes in Figma; strong background in design systems and information architecture. Collaborates with product, engineering, and research to iterate product strategy and move designs toward implementation.

Education

University of California, Santa Cruz — Santa Clara, CA
Master of Science in Human Computer Interaction — *Sep. 2026 – Dec. 2027*

University of Liverpool — Liverpool, UK
Bachelor of Art, Urban Planning- First Class Honours — *Sep. 2024 – May 2026*

Xi'an Jiaotong-Liverpool University — Suzhou, China
Bachelor of Engineering, Urban Planning and Design-Academic Excellence Award — *Sep. 2022 – June 2024*

Experience

Software Design Intern (UX Focus) — July 2024 – August 2024
Shuzhuo Tech Co. — *Shanghai, China*

- Led interaction design and usability testing for M-Echo, a hybrid meeting device and companion app, identifying friction in device availability, session ownership, and recording attribution across real meeting workflows.
- Applied systems thinking to map cross-device dependencies and end-to-end user flows across hardware, mobile app, calendar booking, recording, and system-status states.
- Translated research insights into wireframes, interaction flows, and high-fidelity interactive prototypes in Figma, partnering with product and engineering to iterate requirements and inform implementation.

Product Management Intern (UX/Product Design Focus) — May 2024– June2024
Lee Kum Kee Health Products Group — *Guangzhou, China*

- Analyzed behavioral data from 23,944 users and research with 33 participants to identify onboarding barriers, including 61.1 percent first-practice incompletion.
- Designed interaction improvements for a predominantly 50+ user base to improve AI prompt discoverability, navigation, loading feedback, and system-status visibility.
- Collaborated with product and engineering on implementation recommendations; 87-day practice completion increased from 32.6 to 40.63 percent.

UX Research & Design Project Lead — May 2023 – August 2023
Xi'an Jiaotong-Liverpool University — *Suzhou, China*

- Led a multidisciplinary project through user research, concept development, prototyping, and iterative design, coordinating research, planning, and final deliverables
- Synthesized qualitative and quantitative findings into user needs, design requirements, and visual concepts
- Communicated design rationale and research findings through presentations and project deliverables to academic stakeholders

User Research Intern — July 2023 – August 2023
Dataway Data Analysis Co. — *Guangzhou, China*

- Analyzed 1,500+ pieces of public user feedback to identify recurring needs, behavioral patterns, and usability pain points.
- Synthesized qualitative and quantitative data into actionable user insights and product recommendations for decision-making.

Technical Skills

UX Design: Interaction Design, UI Design, Information Architecture, User Flows, Design Systems, Wireframing, High-Fidelity Prototyping
UX Research: User Interviews, Usability Testing, Qualitative Research, Quantitative Research, Thematic Analysis, Reseach Synthesis, A/B Testing
Tools Technicals:Figma, Adobe Photoshop, Illustrator, InDesign, AI-Assisted Prototyping, Codex, Github,Python, Arduino, Blender, Unity, SketchUp
